To,
The Visa Officer,
The Canadian High Commission,
New Delhi, India

Subject: Application for the study permit to study Cyber Security at Sault College, Brampton, Ontario, Canada.

Respected Visa Office,

I feel extremely humble and honoured to get this wonderful opportunity to make you walk with my interest to get enrolment in Cyber security in the Post-Graduate at Sault College Brampton Campus, Brampton, Ontario, Canada. I am delighted to introduce myself that, I am Surendra Mahato, a permanent resident of Harion Municipality- 01, Sarlahi (Previously known as Attrauli V.D.C. - 01, Sarlahi) with passport number 11676228 born on 4th October 1996, as the only son in a family of Four (father, mother, sister and me), I have always been loved and cared by my family. My father, Mr. Jibachh Mahato, and my mother Mrs. Murti Devi are the biggest inspiration in my life. They have taught and nurtured my childhood with much love and shaped my personality into an equally caring and confident person. The credit for my upbringing goes to my family as they have taught me to be kind, honest, responsible, and patient.

When I was studying in Grade 4, my grandmother brought a desktop computer for me, and I was so happy of it. As time passed, I started spending time on the computer and my interest goes towards technology and I decided to go deeper into the IT field. So that I completed my (10+2) education level in the science field to study computer science and engineering for my higher study. Till (10+2) education level I have done in Nepal and for my higher education (B. Tech), I graduated from Visvesvaraya Technological University (VTU), Belagavi, Karnataka, India in 2020/2021 A.D. When I was studying in the 3rd year of my undergraduate level, I have done an internship in Web Application development during the term break in Rbits Technologies located at Yelahanka Newtown, Bengaluru. Thereafter, I started handling web development projects getting from different institutions during the lockdown and I utilized that time in building projects related to web development. But my interest was not in web application development, so I started searching for a company related to networks.

As I completed my bachelor's degree during lockdown I started appearing for interviews. Due to lockdown, the mode of the interview was virtual, when I appeared for an interview taken by Kshireshwar Network Pvt. Ltd, I got selected and for a few months, I worked virtually from Bangalore, when the pandemic became normal, I came to Nepal and joined company physically.
I am working as a junior Executive Tech Support Engineer in the field of security measures, system configuration and implementation of software. This profession taught me about the worth of information and how important it is in the real world. Protecting sensitive data from external threats such as hackers appears to be becoming more difficult by the day. So, to improve my overall cyber security skills, I decided to study overseas. I gave an English

proficiency test PTE and scored overall 63 (Listening-61, Reading-60, Writing-61, and Speaking-71).

With the growth of technology, practically everyone now has access to the internet. Cyber security threats have become one of the serious concerns of modern society; nowadays, people intentionally hack others' information for its misuse or planning a digital fraud. As a result, there has recently been a slew of issues relating to internet security and privacy, as the number of cyber-attacks has risen drastically, becoming more sophisticated and difficult to identify and remove. So, with time, more advanced solutions would be required to counter cyber security threats in the future. Here comes the role of cyber security professionals who designed digitally reliable and secured platforms and software that ensures maximum protection from cyber security attacks. After the research, I found that with rapid technological advancement, the internet has become an integral part of global development. The world today faces genuine challenges related to the internet and security. Digital attacks that can damage global organizations are a threat today. And it is evident that in the coming future, a much larger workforce of cyber security professionals would be needed to tackle the sharply hiking graph of digital frauds. As a result, cyber security is a genuine necessity and has a wider scope worldwide. Considering this, I wanted to learn more about cyber security and threat management.

During my research, I found that Canada is the best destination for thousands of international students, as one of the most important reason is that Canada is known to offer high-quality education at an affordable tuition fee with degrees that are globally recognized, as colleges from Canada has a long history and reputation in terms of academic performance. Canada is an affluent and stable country with a negligible crime rate and a good health care system. With a wide range of education providers, the country has been very welcoming to international students. Canada provides a sense of security for international students. Along with the multicultural environment and ease of language comprehension, Canada lies on the list of the happiest countries in the world. Studying with people from various cultures and groups could offer me vital cultural knowledge and improve my communication skills. The Canadian education system has been widely accepted as one of the most impressive systems in the world with its affordability and encouraging policies. During the pandemic many countries were sending international students to their homeland, I believe that Canada was the first country to help students with the different prospects which was quite substantial and that made me feel safer to choose Canada as my study destination. As I was browsing through all the countries and their education facilities, I became confident in my decision to choose Canada as my study destination. Added with the availability of my preferred course, all the features of the country became an added perk to making my decision.

Only a few colleges like Texas International College, Islington College and Softwarica College of IT & e-commerce are proving courses in cyber security. But the courses offered there are more theoretical and less practical due to the lack of the newest essential resources and methods of teaching. For a computer science-related field like MIT, where the theories should go hand in hand with the practical, the education system in Nepal is less preferable. After knowing about the excellence of the education system in Canada and its practicability in the global market, I believe that my decision for higher studies in Canada will shape me into a skilful, creative, and highly competent in the global band.

Cyber Security is two years advanced course that provides deeper knowledge and understanding of security in cyberspace. Here, I will gain valuable knowledge of computer network design and implementation, Cyber security principles and their best practices, Computer programming and algorithms, Cloud Security, Cryptography, and data encryption, wireless communication and Mobile security, Web security, Cybercrime law, Forensics and Investigation, Ethical Hacking, penetration testing and secure network infrastructure and Routing and Switching which would give me further knowledge on how security in cyberspace are implemented and maintained. Furthermore, my vulnerability analysis, incident response, and AI programming for cyber-security will develop gradually due to this program. The cyber security program includes an internship which will enable me to apply my skills in a working environment. It provides me with a lot of opportunities in real-world IT business environments to connect with top-class employers. It earns me Canadian working experience, which will help me after graduation to work efficiently.

It was hard for me to decide which institution is the best fit for me from a list of hundreds of world-class institutions. I decided to go for Sault College, as this college provides an inspiring and supportive learning environment that delivers enriching experiences that extend beyond the classroom. Expedia ranked Sault College as one of the top 10 Friendliest cities in Canada, in 2018. The International Department of Sault College hosts many cultural events and festivals while helps us to adjust in Canadian culture. Moreover, it encourages blended academic learning, hands-on training and community involvement opportunities to help to achieve one's goal, the dream career. This comprehensive course will offer hands-on practical training in planning, coordinating, and executing projects according to specific requirements and constants. Furthermore, it will provide in-depth knowledge about proper utilization of budget, enforcing teamwork, maximizing resources and costs control.

Cybercrime is on the rise in our country because of technological advancements and their widespread influence. My education will be one of the cornerstones for managing and eliminating all potential hazards in Nepalese IT companies, helping to prevent cyber-related crimes. After I finish my study, I plan to return to Nepal because the IT technical industries are booming there and have many prospects. I have a full-proof method to start an IT security program that will assist IT companies in protecting their data from incoming cyber-attacks. In addition, I'd like to work with a reputable cyber security firm such as CryptoGen Nepal, ThreatNix, or Eminence Way. However, I've considered launching my own IT Company which provides cyber security services to various IT companies and businesses. Sault College degree will help me to gain managerial, financial, and operational and leadership abilities towards assisting better cyber security for people.

Apart from my professional career, being the only son in my family, I have certain duties and responsibilities. I am also responsible for looking after my family since they have been supporting me since day one and my prime duty is to give them the happy retirement life that they deserve since they have contributed and invested a lot in my overall development and progress. To spread my wings, my parents are sponsoring me for my study and accommodation during my stay in Canada for the purpose course. So, they have already paid one-year tuition fees at Sault College.

In addition to my career, my emotional ties towards family, homecoming promise to parents, relatives and attachment to my native lifestyle will surely bring me back. So, there is no reason except from study for me to prolong my stay in Canada as my parents and all of my dreams are here in Nepal. Finally, I would like to kindly request you to approve my study permit application and grant me a student visa to make me able to attend the aforesaid program.

I have enclosed the necessary documents which ensure that I have sufficient funds to meet the college tuition fees and my living cost in Canada. I am hopeful for a positive response from you. Thank you.

Sincerely yours
Surendra Mahato

CAREER OBJECTIVE

Passionate IT graduate seeking opportunities to develop my skills and abilities to achieve academic as well as professional growth. Driven to learn, develop and succeed in this advancing technological era.

EDUCATION PROFILE

Bachelor of Technology in Computer Science and Engineering,
VISVESVARAYA TECHNOLOGICAL UNIVERSITY (VTU), INDIA
August 2016- December 2020
CGPA: 6.52/10

Higher Secondary Education (10+2),
MODEL MULTIPLE COLLEGE, NEPAL
July 2014- April 2016
Percentage: 53.50 %

School Leaving Certificate (SLC),
SUNRISE HIGHER SECONDARY SCHOOL, NEPAL
Year of Completion: June 2013
Percentage: 66.38%

ENGLISH PROFICIENCY TEST- PTE

PTE Overall: 63 (Listening- 61, Reading- 60, Writing-61, Speaking-71)

WORKING EXPERIENCE

Junior Executive Tech Support Engineer,
KSHIRESHWAR NETWORK PVT. LTD
February 2021 – Present

Responsibilities:
- Configuration and implementation of software.
- Troubleshooting computer problems.
- Implementing security features.

- Offering technical support.
- Prepare accurate and timely reports.

RELEVANT SKILLS

- Setup and installation of Software
- Upgrading Security Software
- Python
- Java
- .NET
- Virtual Working Capabilities

- Effective problem-solving skill
- Establishing interpersonal relationship
- Work ethic
- Effective communication skill
- Positive attitude

ACHIEVEMENTS

- Received a scholarship of 30% on undergraduate studies from Brindavan College of Engineering

ACTIVITIES

- Participated in *Introduction to middleware development, 2020* in PEC
- Participated in *Intellectual Property Rights for Academic, 2020* in VIT

To Whom It May Concern:

This is to certify that Mr. Surendra Mahato have been working in the role of junior Executive Tech Support Engineer (Network) in the Information Technology (IT) Division, during the period beginning of 05/02/2021 to 30/07/2022.

During his tenure with us here, at Kshireshwar Network Pvt Ltd. He has been hardworking, loyal and carried out his roles and responsibilities such as implementing security features, offering technical support, troubleshooting computer problems, configuration and implementation of software. His supervisor sings praises of his fine performance and he has been a great addition to his team.

We wish him all the best in his future endeavours.

For Mr. Surendra Mahato

KSHIRESHWAR NETWORK PVT. LTD

Date: 30/07/2022

To Whom it May Concern:

I am pleased to recommend Mr.Surendra Mahato, who have been a junior Executive Tech support Engineer for the past one and half year. During that time, I came to know him as a strong IT engineer and a role model for his peers.
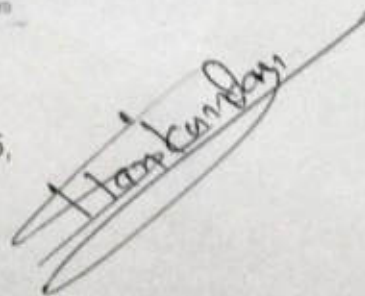

Mr.Surendra is a rare type of junior Executive Tech support Engineer who combines exceptional natural ability with a willingness and eagerness to learn and implement. Mr.Surendra is able to help his peers with difficult security concepts but does so in a way that is both practical and non-condescending. Although he is aware of his natural ability in the area of security measures, Mr.Surendra is constantly challenging himself. He is a part of the company's Team, which challenges local companies as well as international companies. He is also active in the community of the engineer by being a member of Greenpeace, and a cheerleader, while also playing defense on our company's soccer team.

Mr.Surendra would make an excellent candidate for early admissions to study abroad as well as to work as a Cybersecurity Engineer. I recommend him without hesitation.

Sincerely

Mr.Harikundan Mahato

To Whom It May Concern

I am pleased to write this letter of recommendation for **Mr. Surendra Mahato**, in his pursuit of obtaining a Master's Degree from your esteemed institution I have had several opportunities to gain an insight into Mr. Surendra Mahato personality and work ethic and he comes across as a trustworthy and dependable personality.

Mr. Surendra Mahato has consistently impressed me with his sincerity, skill and dedication towards his work. He is hard-working, confident, social and self-motivated student, who I'm sure would be asset to your Institution. I am sure you will find in him a student whose aptitude will be further enhanced through your Master's program. I recommend that he be given an opportunity to pursue a Master's program from your esteemed Institution.

The program offered at your university is globally acclaimed course which is rated highly for its advanced exiting technologies. He hopes to engage under the program and work on broad range of collaborative areas tackling real world issues. Moreover, I believe your university will provide excellent networking opportunities with some of country's top technological institutions.

Throughout his college life he tried to maintain a healthy balance between studies and extra- curricular activities. During his undergraduate studies he took part in various cultural and technical activities and also organized various events held in the college's fest.

I feel he is adequately prepared both in having the technical qualification and the right mindset.

Please feel free to contact me for any further Information.

Sincerely,
